

R PermutedLinearStatistic

```
graph LR; R[R PermutedLinearStatistic] --> C[C PermutedLinearStatistic]; R --> ncol[ncol]; R --> nrow[nrow];
```

The diagram illustrates the relationship between an R object and its C counterpart, along with their dimensions. A central box labeled 'R PermutedLinearStatistic' has three outgoing arrows: one pointing to 'C PermutedLinearStatistic' at the top right, one pointing to 'ncol' at the middle right, and one pointing to 'nrow' at the bottom right. The 'R PermutedLinearStatistic' box is shaded gray, while the others are white.
